“Small Worlds” – Small Worlds highlights different techniques, styles and various types of paperweights from the 19th century, the classic period for paperweight manufacture, to present day. This exhibition features works from the classic period by European glass factories like French crystal manufacturers Baccarat, Clichy and Saint-Louis. Some of the earliest contemporary paperweights in Small Worlds were created by Charles Kazium and Dominick Labino, both members of the Studio Glass Movement. Numerous works by Paul Stankard, Rick Ayotte and Cathy Richardson as well as artworks by seventeen other contemporary paperweight makers are also featured.

“From Lens to Eye to Hand: Photorealism 1969 to Today” – This exhibition reexamines the important contemporary art movement that found its roots in the late 1960s in California and New York and continues today, known as Photorealism. Photorealism features ordinary elements of contemporary life such as vehicles, buildings, streets and consumer products in an objective, often clinical, manner. The paintings that make up this exhibit demonstrate that Photorealism remains undiluted, conceptually coherent and consistently compelling.

Things to Do in Flint & Genesee

for the week of June 25-July 1

"In Search of Lost Time: Peter Milton Prints" – Drawn from the FIA's permanent collection and loans from a private collection, these elaborately detailed, large-scale etchings explain Peter Milton's fascination with the 19th century, using references from literature, early photography and painters such as John Singer Sargent as well as his interest in photographers of the 1930s such as Andre Kertesz.

"Breaking with Tradition: Contemporary Ceramics" – During the mid-to-late 20th century, ceramicists used a sculptural approach in their work instead of using traditional shapes. Free of the need to make useful or "utilitarian" objects, ceramicists explored the properties of clay and the chemistry of glazes. This exhibition reflects the desire of ceramicists to experiment and depart from ceramics as purely functional objects.
